

HEAT TRANSFER MACHINE

PD-1700D-600

High
Productivity
LOW
MAINTENANCE

Advantages

- Easy to operate, simple in setting speed, temperature and pressure
- Both transferring pieces and rolls are easy accessible to the material
- The pre-cut pieces are easily placed because of the working table
- The transferred fabrics are easily collected from the machine because of the conveyor belt
- Cooling down timer included
- There are three inflatable shafts: To put print paper, to collect print paper, to collect protect paper
- Flat blanket guarantees better transfer effect

Machine Parameters - PD-1700D-600

Power Configuration	Three-phase four-wire 380V/50HZ
Heating	Oil heating
Voltage	43KW
Drum Surface	Teflon coating
Transfer & Thickness	Applicable to all types of transfer items. Even applicable for carpet and yoga belt. Thickness depends on drum size
Blanket Type	NOMEX
Drum diameter	600mm
Printing width	1600mm
Production	200M/H to 250M/H The above production is based on 100g paper, 100-200g cloth, the actual temperature of the drum surface is 200 degrees, the pressing time is 35-40s. So if you use the lighter paper or cloth, the speed will increase.
Worktable	2.5m or 3.5m
Machine size	2500 (length) *1150 (width) *1400mm (height)
Net weight	2200kg
