

KN/N95 MASK

UNIX[®]
bringing technological edge

Fully Automatic Production Line with Earloop Attaching and Printing

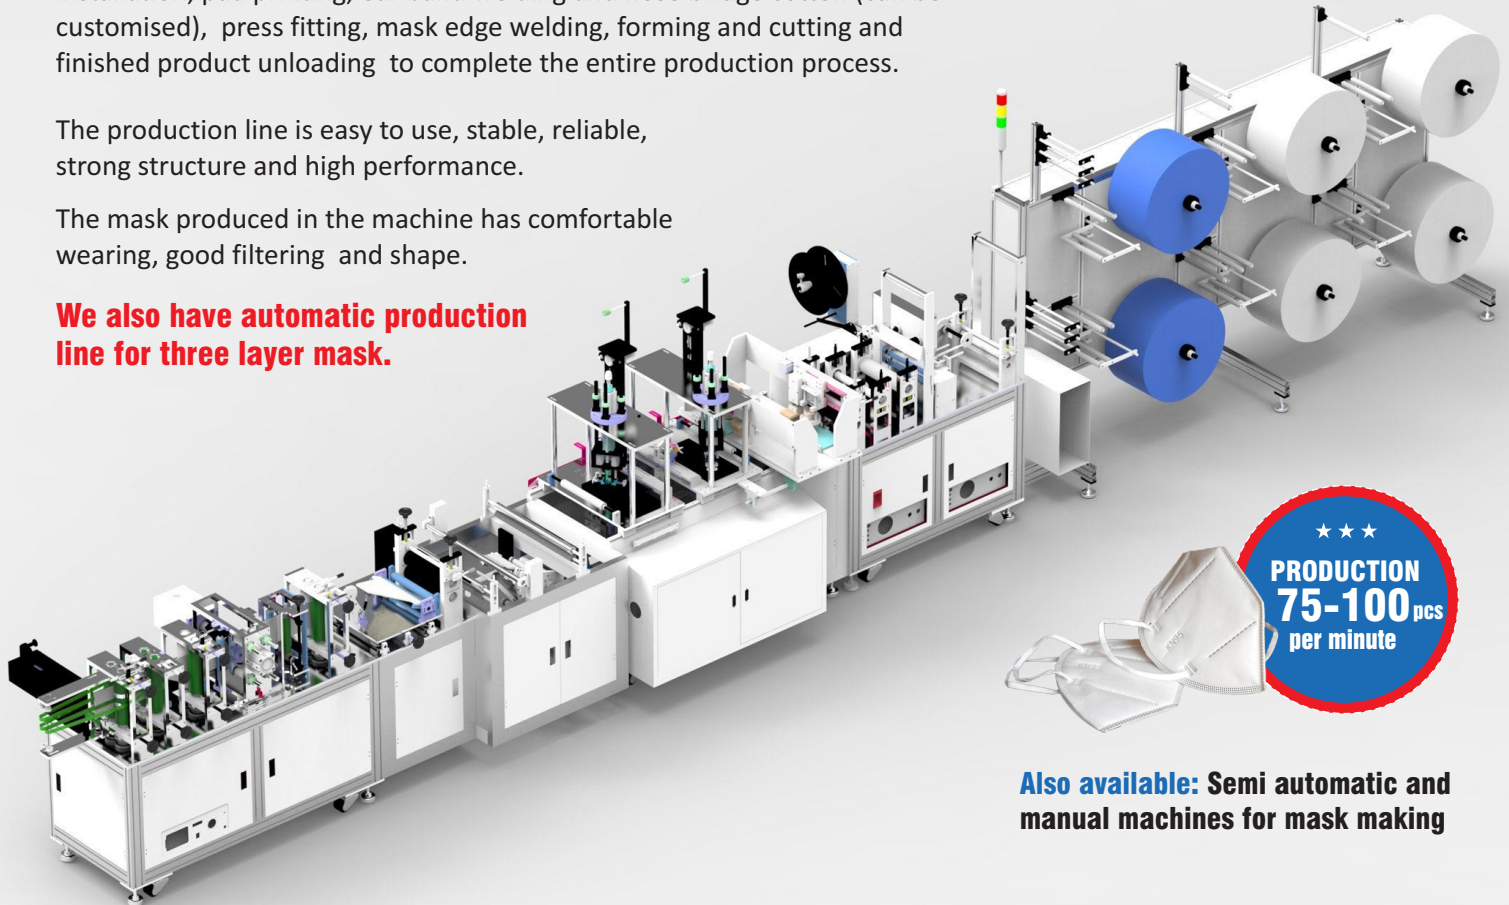

Automation from raw materials to finished masks

This machine is suitable for the automatic production of KN/N95 folding masks. It mainly includes automatic material delivery, nose bridge installation, pad printing, ear band welding and nose bridge cotton (can be customised), press fitting, mask edge welding, forming and cutting and finished product unloading to complete the entire production process.

The production line is easy to use, stable, reliable, strong structure and high performance.

The mask produced in the machine has comfortable wearing, good filtering and shape.

We also have automatic production line for three layer mask.

Also available: Semi automatic and manual machines for mask making
