

MASK STERILIZATION MACHINE

UN-2000

UN-2000 mask sterilization machine is suitable for the mask industry. It mainly kills the mold in the mask before packaging the finished mask to ensure the quality of the mask.

Specification

Item No	UN-2000
Voltage	AC 220V±
Total Power	300W (Max 300w)
Ultraviolet light intensity	≥150mj/cm ²
Conveyor speed	≤1.5m/min
Channel width	470mm
Channel height	200mm
Working temperature	-10~40°C
Net weight	220kg
Dimension	1920mm (L) x 990mm (W) x 1300 (H)
